**HIGH PRESSURE
MEMBRANE
TESTER**
**BULLETIN 127
(7-08)**

HIGH PRESSURE MEMBRANE TESTER

PERFORMS FUEL TESTS TO ASTM D2276/IP216 AT PRESSURES UP TO 450 PSI

- STAINLESS STEEL HOUSING AND VALVES
- INCLUDES GROUNDING AND BONDING HOSE, AND ASTM COLOR RATING BOOK

ASSEMBLY **GTP-3318-100**

Jet fuel particulate contamination testing is performed to ASTM D2276 and IP-216. Conventional equipment on the market is not suitable for high pressures. This is because the plastic monitor is only rated for 100 psi. We have found a way to design a housing which allows testing using standard plastic monitors at up to 450 psi.

See [Bulletin 73](#) for replacement membranes and backup pads. For testing at pressures below 100 psi, see [Bulletin 8](#). For pressure up to 600 psi, order GTP-3318-200.
