## TANK GAUGING TAPES

- Meets government specification Mil-T-16644
- Stainless steel and snap swivel assembly
- Stainless steel resists corrosion and rust
- For all liquids

Selecting the correct tape for your application depends not only on the depth of the tank but the types of fuels or oils in your tanks.

The chromium plated steel tape is exceptionally good for dark oils because the contrast between the wetter and non-wetted surface is easily recognized.

The stainless steel tape has a brushed surface, which aids in identifying the limit of the wetted surface on either dark or clear fuels.

**NOTE:** Plumb-bobs are not included in the stock numbers shown below. Please order the plumb-bob separately. See the other side of this bulletin.
